

iRidium mobile

Technology of Your Comfort

iRidium is software that controls

Smart Homes

Smart Apartments

Home Cinemas

Multiroom Systems

from your smart phone, tablet, lap top and PC

iOS

OS X

What Exactly can iRidium Control?

Lighting

Your home is always in a good mood

Turn on the light in the whole house by touching the screen of a smart phone or a tablet.

Change the mood of your home by dimming the light and changing its color right from your tablet or smart phone.

REALISTIC
ILLUSION OF YOUR
PRESENCE
AT HOME

You go away on vacation but worry that unlit windows of your house or apartment will give away your absence. iRidium relieves you of this worry. A special lighting mode, programmed in iRidium, will create a realistic illusion of your presence at home. You can simply relax and enjoy your vacation.

You left for work in a hurry and can't remember if you switched off the light. With iRidium App on your smart phone you can check the state of every lamp in the house and switch it off, if necessary, on your way to work.

Blinds and Shutters

Your home decoration is active

You can open and close blinds and shutters in the whole house, in a room or on a window from iRidium app on your smart phone or tablet without rising from your cozy arm-chair. Do you want light to be switched on automatically when blinds or shutters get closed? – Here you go! A special scenario makes it possible. All you do is press a button!

Climate

Your home is always cozy

Make your house as warm and pleasant as you want by controlling conditioners and warm floors right from your smart phone.

You can choose any temperature you want for your home. And your house itself will create and keep it, without involving you. You simply enjoy maximum comfort.

Security

Your family and home are safe and sound

If a leakage sensor is suddenly activated, iRidium automatically cuts off water on the floor or in the whole house and sends a notification about it to your smart phone.

Video from your surveillance cameras right on your smart phone or tablet shows you what is happening in your home no matter where you are.

Intercom

You know who is at your door

No matter where you are, with iRidium app on your smart phone or tablet you can see who is at your door and talk to them.

If friends or relatives come for a visit earlier than you arrive home, you can let them in anyway.

Home Cinema

Your phone is your home cinema remote control

Enjoy high quality picture and good sound of your favorite films in your home cinema without straining to remember which remote is for the TV-set, for the DVD player or for the conditioner.

With iRidium you can choose what to watch, adjust the sound and the picture, close the blinds, dim the light, switch on the conditioner from your smart phone or tablet.

If you want, you can prepare your home cinema for viewing by pushing only one button in iRidium app on your smart phone or tablet.

Multiroom System

Easy control of your home's music

Make everybody in your home happy: show your last vacation photos to guests in the sitting-room, play cartoons to children in the playroom, turn on classical music in the kitchen and radio in the terrace. Simply open iRidium app on your smart phone or tablet and choose what you want to show and play in each room.

Rational Energy Consumption

Your home saves your money

Control how much you spend on lighting and heating of your house or apartment with iRidium. When the necessary lighting and temperature levels are achieved, iRidium can automatically switch off the light and decrease the power of heaters or conditioners. Your home cuts your energy expenses.
